IMA-jet

| Section 1. Identification |  |
| :--- | :--- |
| GHS product identifier | : IMA-jet |
| Product use | : Insecticide. |
| Supplier's details | : Arborjet <br> 99 Blueberry Hill Road <br> Woburn, MA 01801, USA <br> $1-781-935-9070$ |

## Section 2. Hazards identification

## OSHA/HCS status

Classification of the substance or mixture
: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
: ACUTE TOXICITY (oral) - Category 4 SKIN CORROSION/IRRITATION - Category 2 SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2B

## GHS label elements

## Precautionary statements

## General

Prevention

Response

Storage
Disposal
Hazards not otherwise classified
:

: Warning
: Harmful if swallowed.
Causes skin and eye irritation.
: Not applicable.
: Wear protective gloves. Wear eye or face protection: Recommended: splash goggles. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling.
: IF SWALLOWED: Call a POISON CENTER or physician if you feel unwell. Rinse mouth. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing.
Wash contaminated clothing before reuse.
If skin irritation occurs: Get medical attention.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.
: Not applicable.
: Dispose of contents and container in accordance with all local, regional, national and international regulations.
: None known.

## Section 3. Composition/information on ingredients

| Substance/mixture | $:$ Mixture |
| :--- | :--- |
| Other means of |  |
| identification | $:$ Not available. |

## CAS number/other identifiers

| CAS number | $:$ Not applicable. |
| :--- | :--- |
| Product code | $: 1$ Liter 040-2003 12 Case 040-2006 |

| Ingredient name | $\%$ | CAS number |
| :--- | :--- | :--- |
| Proprietary 1 | Proprietary 1 | - |
| Proprietary 2 | Proprietary 2 | - |
| 2-Imidazolidinimine, 1-[(6-chloro-3-pyridinyl)methyl]-N-nitro-, (2E)- | $\geq 5-<10$ | $138261-41-3$ |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.
There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.
Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

## Description of necessary first aid measures

| Eye contact | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. |
| :---: | :---: |
| Inhalation | Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| Ingestion | Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

## Most important symptoms/effects, acute and delayed

## Potential acute health effects

Eye contact : Causes eye irritation.

Inhalation : No known significant effects or critical hazards.
Skin contact : Causes skin irritation.
Ingestion : Harmful if swallowed.

## Over-exposure signs/symptoms

## Section 4. First aid measures

| Eye contact | $:$Adverse symptoms may include the following: <br>  <br>  <br>  <br>  <br>  <br> wain or irritation <br>  <br>  <br> redness |
| :--- | :--- |
|  | $:$ No specific data. |
| Inhalation | : Adverse symptoms may include the following: |
| Skin contact | irritation <br> redness |
|  | $:$ No specific data. |

## Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments : No specific treatment.
Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

## See toxicological information (Section 11)

## Section 5. Fire-fighting measures

Extinquishing media
Suitable extinguishing media
Unsuitable extinguishing media
: Use an extinguishing agent suitable for the surrounding fire.
: None known.

In a fire or if heated, a pressure increase will occur and the container may burst.
: Decomposition products may include the following materials:
carbon dioxide carbon monoxide
nitrogen oxides
sulfur oxides
halogenated compounds

Special protective actions : Promptly isolate the scene by removing all persons from the vicinity of the incident if for fire-fighters

Special protective equipment for fire-fighters
there is a fire. No action shall be taken involving any personal risk or without suitable training.
: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

## Personal precautions, protective equipment and emergency procedures

: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

## Section 6. Accidental release measures

## Methods and materials for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up <br> if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and <br>  <br> place in an appropriate waste disposal container. Dispose of via a licensed waste <br> disposal contractor. |
| :--- | :--- |
| Large spill | : Stop leak if without risk. Move containers from spill area. Approach release from <br> upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash |
|  | spillages into an effluent treatment plant or proceed as follows. Contain and collect <br> spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or |
|  | diatomaceous earth and place in container for disposal according to local regulations |
| (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated |  |
| absorbent material may pose the same hazard as the spilled product. Note: see |  |

## Section 7. Handling and storage

## Precautions for safe handling

Advice on general
occupational hygiene
: Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, : Store in accordance with local regulations. Store in original container protected from including any incompatibilities direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

## Section 8. Exposure controls/personal protection

Control parameters
Occupational exposure limits

| Ingredient name | Exposure limits |
| :--- | :--- |
| Proprietary 2 | AlHA WEEL (United States, 10/2011). |
|  | TWA: 250 ppm 8 hours. |

## Appropriate engineering

 controlsEnvironmental exposure controls
: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## Individual protection measures

Hygiene measures
: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.
Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

| IMA-jet |  |
| :---: | :---: |
| Section 8. Exposure controls/personal protection |  |
| Eye/face protection | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles. <br> Recommended: splash goggles |
| Skin protection |  |
| Hand protection | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Recommended chemical resistant gloves: polyethylene, butyl rubber, neoprene rubber or viton. |
| Body protection | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Other skin protection | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Respiratory protection | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. |
| Personal protective equipment (Pictograms) |  |

## Section 9. Physical and chemical properties

## Appearance

| Physical state | $:$ Liquid. |
| :--- | :--- |
| Color | $:$ Red. |
| Odor | $:$ Aromatic. [Slight] |
| Odor threshold | $:$ Not available. |
| pH | $: 5.73$ |
| Melting point | $:-80^{\circ} \mathrm{C}\left(-112^{\circ} \mathrm{F}\right)$ |
| Boiling point | $: 178^{\circ} \mathrm{C}\left(352.4^{\circ} \mathrm{F}\right)$ |
| Flash point | : Closed cup: $97^{\circ} \mathrm{C}\left(206.6^{\circ} \mathrm{F}\right)$ [Pensky-Martens.] |
| Evaporation rate | Not available. |
| Flammability (solid, gas) | $:$ Not available. |
| Lower and upper explosive | $:$ Not available. |
| (flammable) limits | $: 0.027$ kPa (0.2 mm Hg$)$ [room temperature] |
| Vapor pressure | $:$ Not available. |
| Vapor density | $:$ Not available. |
| Relative density | $:$ Not available. |
| Solubility | $: 0.4$ g/l |
| Solubility in water | Not available. |
| Partition coefficient: n- | Not available. |
| octanol/water | Not available. |
| Auto-ignition temperature | Not available. |
| Decomposition temperature |  |

## Section 10. Stability and reactivity

## Reactivity

## Chemical stability

Possibility of hazardous reactions

Conditions to avoid : No specific data.

Incompatible materials

Hazardous decomposition products
: The product is stable.
: Oxidizers not be produced.

No specific test data related to reactivity available for this product or its ingredients.
: Under normal conditions of storage and use, hazardous reactions will not occur.
: Under normal conditions of storage and use, hazardous decomposition products should

## Section 11. Toxicological information

## Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |

## Mobility in soil

Soil/water partition
coefficient (Koc)

Other adverse effects : No known significant effects or critical hazards.

## Section 13. Disposal considerations

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not available.
to Annex II of MARPOL
73/78 and the IBC Code

## Section 15. Regulatory information

## U.S. Federal regulations : TSCA 8(a) CDR Exempt/Partial exemption: Not determined

 United States inventory (TSCA 8b): Not determined.FIFRA Information: This chemical is a pesticide product registered by the Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels of nonpesticide chemicals. Following is the hazard information as required on the pesticide label:

## WARNING

Harmful if swallowed, inhaled or absorbed through the skin.
Causes substantial, but temporary eye injury.
Do not get in eyes or on clothing.
Wear safety glasses.
Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.
Remove and wash contaminated clothing before reuse.
Keep children and pets away from treatment area until injection and uptake are complete.
